

Pricing — *the code is free; being current is the product.*

Open-core: audit the encodings free · pay for the hosted, counsel-verified, always-current guarantee.

ILLUSTRATIVE — anchors for a conversation, not published prices. Validate with design partners.

Community

self-hosters · evaluation

\$0

self-run · open source

- § The engine + encodings, open source
- § Run it in your own stack
- § Community / GitHub support
- Counsel-verified content
- Amendment feed · SLA

Developer

prototyping · SMB · indie apps

~\$99–499/mo

per determination · incl. volume, then overage

- § Hosted REST API + MCP tools
- § Counsel-verified shipped jurisdictions
- § 99.5% SLA
- § Email support
- § Self-serve, start in minutes

MOST COMMON

Platform

payroll / HRIS / EOR / leave-mgmt / AI copilots

PEPM · or committed bundles

~\$0.25–1.00 per covered employee / mo

- § Everything in Developer, plus —
- § **Amendment webhooks** · always current
- § 99.9% SLA · priority support + Slack
- § Audit-log retention · MCP at scale
- § **Partner-priced** during the design phase

Enterprise

large platforms · insurers · regulated

Custom · annual, \$50k+

committed volume + custom terms

- § Everything in Platform, plus —
- § VPC / data-residency · SSO / SCIM
- § Indemnification (with a cap)
- § Custom jurisdictions · priority verification queue
- § 99.95% SLA + credits · dedicated CSM

THE OPEN-CORE LINE

Free self-host · "as is" · web-researched · no SLA

Paid hosted · counsel-verified · always current · SLA · indemnified

WHAT YOU PAY FOR

Counsel-verified content · always current (amendment feed) · SLA + support · indemnification · audit trail. Never gated: currency and amendment alerts are the reason to pay.

ADD-ONS

Extra jurisdictions / domains · priority verification · self-host commercial license + support · higher indemnification cap · white-label checker.
